## INTRODUCTION

R. G. Bucksar

This supplement is the second addition to the original Bibliography of Socio-Economic Development of Northern Ontario, which has initiated in 1967. Prior to 1967, little had been done to accumulate the written resources of northern Ontario. Often I had personal need of such a bibliography as a research tool for my work in northern Ontario. Under the direction of Jim Lotz and through the auspices of the Canadian Research Centre for Anthropology (St. Paul's - Ottawa) and the Department of Treasury and Economics - Regional Development Branch, we commenced our work in the Summer of 1967.

Since 1967 we have collected nearly two thousand references dealing mainly with northern Ontario. From the response to me personally, I feel that the project has been entirely worth-while. Many individuals and agencies have written to ask for copies and offer assistance and suggestions. In this supplement, we have followed two new suggestions: (1) allowing more 'white' space between the entries for easier reading and note space, and (2) the addition of an areal index to allow for easy selection and collection of materials dealing with a particular area.

Example:   Sudbury  
              Agriculture 2:4

The subject heading is agriculture in the Sudbury region.  
The entry is on page 2 - item 4

In time we hope to continue the bibliography with another supplement or perhaps, with further suggestions for organization, etc., re-organize the entire contents of all the work since 1967 under one set of covers.
